

I own a small fleet of over the road trucks. I have xm radio in all of my trucks. My drivers and myself use the xm instant weather and traffic stations when we travel to the metropolitan areas that are covered to keep us informed on whats ahead of us. It keeps us out of problem areas so we do not add to the traffic congestion. When inclement weather is ahead of us we know how to handle the situation before we end up in the middle of it. I hope that xm radio will add more metropolitan areas to their line-up.

Sincerely,

John Ash

President, Number One Transport Inc.
